SUMARRY

Dynamic and Innovation-Driven Full Stack Developer with a strong foundation in designing and scaling end-to-end applications using Java, Spring Boot, React, Rocket (Rust), and Echo (Go). Demonstrated expertise in RESTful API design, secure backend architectures, and high-performance frontends across diverse domains. Passionate about writing clean, maintainable, and production-grade code backed by solid architectural principles.

With 25+ independently developed real-world projects, I specialize in building resilient systems, optimizing performance, and integrating modern DevOps and cloud deployment pipelines (AWS, Koyeb, Railway, Render). I'm driven by innovation, community impact, and continuous learning — transforming ideas into reliable, scalable, and user-centric software solutions.
